

Wuhan Dr. Lee's TCM Clinic Offers Diuretic and Anti-inflammatory Pill to Treat Chronic Pelvic Pain Syndrome Patients

Herbal medicine Diuretic and Anti-inflammatory Pill of Wuhan Dr.Lee's TCM Clinic has helped many patients get rid of chronic pelvic pain syndrome.

SAN FRANCISCO, CA, US, January 8, 2021 /EINPresswire.com/ -- According to Reuters, acupuncturist and herbalist Clayton Shiu says demand for traditional Chinese remedies has surged at his practice since March 1, the day New York announced its first case of the novel coronavirus.

In the prevention and control COVID-19, Traditional Chinese medicine has demonstrated its distinctive advantages and contributed significantly to its strength. It has contributed to COVID-19 control. It also plays a vital role in treating some chronic diseases, such as [chronic pelvic pain syndrome](#) (CPPS).

Nowadays, herbal medicine has become an essential part of building a community of common destiny for humankind and "One belt, One road" international cooperation. Li Xiaoping's TCM Clinic also quietly contributed her strength.

Dr. Lee has worked hard to know ancient Chinese medicine theory and modern Chinese medicine research achievements. Her Diuretic and Anti-inflammatory Pill, with the effects of clearing heat and detoxification, activating blood circulation, and removing blood stasis, has cured thousands of chronic pelvic pain syndrome patients around the world.

At present, people mainly adopt antibiotics and α -blockers for CPPS. However, multicenter clinical studies have shown due to the specificity of the prostate's anatomical structure—the deeper intima of the capsule, it is easy to cause local microcirculation disturbance, blockage of blood stasis, drainage blocked. As the most important part of Chinese medicine, Chinese herbal medicine has been widely used in clinical trials of CP/CPPS in recent years.

The treatment principle of Diuretic and Anti-inflammatory Pill in chronic pelvic pain syndrome:

Due to the unique physiological structure, many drugs can not directly reach the lesion site,

making the therapeutic effect of drugs decrease, which becomes a great difficulty in CPPS treatment. Diuretic and Anti-inflammatory Pill completely breaks the previous anti-inflammatory therapy of prostate diseases. It can comprehensively improve the internal and external state, eliminate inflammation, recover the prostate gland, and effectively solve drug penetration and drug absorption problems.

[Herbal medicine Diuretic and Anti-inflammatory Pill](#) is powerful and direct to the affected area. First of all, it can open the capsule channel and gland duct to discharge the inflammatory substances from the body smoothly. The metabolism channel and nutrition channel are then open to remove the lipid accumulation in the small blood vessels. Its effective concentration can reach the lesion directly, remove genitourinary tract inflammation from the root. Many symptoms caused by CPPS, such as urinary pain, urgency, pelvic pain, sexual function problems, erectile dysfunction, and other pain and discomfort, are eliminated.

Moreover, it comprises more than 50 kinds of natural plant ingredients, such as honeysuckle, plantain seed, *Houttuynia cordata*, peach kernel, etc. It will not do any harm to the body. More importantly, it can improve the human genitourinary system's overall internal environment, help clean the glandular duct, eliminate the lesions, activate the blood circulation, and achieve the purpose of treatment.

Devon, from the United States, has been suffering from CPPS for eight years. During this period, he tried various treatment methods, such as antibiotics, physical therapy, rectal microwave therapy, etc. but could not wholly relieve his pain. He even began to seek psychotherapy, but the pain was still with him. Finally, he found Dr. Lee's TCM Clinic and began treatment.

To his surprise, within two courses of treatment, some of his symptoms were greatly relieved, so he continued to another three courses. After five courses of treatment, he told Dr. Lee that his symptoms had almost disappeared and that the results were normal.

Besides CPPS, Diuretic and Anti-inflammatory Pill can cure the inflammation and infection spread in other parts, such as [epididymitis](#), seminal vesiculitis, orchitis. Its effect is working on the whole tissue system.
