

Global Accelerometers Market In-Depth Analysis, Current & Future Trends | By Type, End-user Industry, Application

SHANGHAI, CHINA, January 8, 2021

[/EINPresswire.com/](https://www.einpresswire.com/) -- Accelerometers are electromechanical devices that provide measurement of static, constant, or dynamic acceleration. Further, the measurement of static acceleration along with programmable code has various applications in engineering and computational world such as laptops, smartphones, and systems.

The increase in popularity and benefits associated with MEMS technology fuels the adoption of digital accelerometer and is expected to drive the growth of market in coming years. Further, rise in demand of improving accuracy in navigation and growth of [aerospace industry](#) also boost the growth of the market. However, complexity and costs involved in accelerometers continue to restrain the growth of this market. Opportunities such integration of sensors and Internet of Things (IoT) in accelerometers can further improve the scope of accelerometers in industrial application.

The global accelerometer market is segmented on the basis of by type, end-user industry, application, and geography. By type, the market is bifurcated into analog accelerometer and digital accelerometer. By end-user industry, the market is categorized into aerospace & defense, automotive, industrial, consumer electronics, and others. By application, it is divided into navigation, transport, and others. By geography, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Key Players:

At present, the global accelerometers market is dominated by Aeron, Honeywell, Ixblue, L3 Communications, Lord Microstain, MEMSIC, SBG Systems, Systron Donner, Inc., Trimble Navigation, and Vectornav Technologies.
