

Best-selling Air-sanitizing Desktop Lamp to Protect You in Office Against Airborne Viruses

The best-selling Aledra Desktop Lamp uses a filter that is coated with a high-density photocatalyst material, and achieves 99.5% H1N1 Influenza A virus.

RENTON, WA, UNITED STATES, January 11, 2021 /EINPresswire.com/ -- The best-selling Aledra Desktop Lamp uses a filter that is coated with a high-density photocatalyst material, which is activated by visible light, and eliminates airborne pathogens when trapped in the coated filter. This disinfection process is known as Photoelectrochemical Oxidation (PECO). Test Results from an independent lab found that the Aledra Desktop Lamp deactivated 99.5% H1N1 Influenza A virus in a 1000 cubic-foot test chamber in 60 minutes. Since the Aledra Desktop Lamp does not emit UVC which is a potential health hazard, there are no safety concerns. It can operate 24/7 in various application environments.

“

This is the most effective and affordable air-sanitizing lamp that we take pride in. And I bought one for every of my family members so they are well protected against COVID-19 virus.”

Matthew Maa

Additional features of the Aledra Desktop Lamp include:

- Circadian light selections: 2700K, 4000K, and 5000K and can be adjusted depending on the time of day
- Bi-Level Dimming
- (2) USB ports for charging portable electronic devices

To purchase the Air-Sanitizing Desktop Lamp to best protect your family against the flu bugs and COVID-19, please contact Aledra at info@aleddra.com or 425-430-

4555.
