Courier service providers are now offering on-demand delivery services for faster and more efficient delivery of parcels. On-demand delivery provides customers with a flexible option of getting packages delivered at their convenient time and place. This service can also be integrated with point-of-sale systems and ecommerce platforms, which enable courier companies to efficiently manage their operations and thus is a cheaper, faster and more reliable mode of parcel delivery. For instance, UberRUSH is an on-demand courier delivery service operating in New York, Chicago and San Francisco. On-demand delivery service is being widely used for prescription medicine, laundry pickup and delivery, fast food delivery and marijuana delivery. Major on demand delivery service providers include Postmates, Deliv, Sidecar and Amazon Flex in the USA, PiggyBaggy in Finland and Nimber in Norway. The general transportation and shipping market is driven by such general transport industry trends. The smart transportation market is also rising.

The [global general transport market](#) is expected to grow from \$1.51 trillion in 2020 to \$1.68 trillion in 2021 at a compound annual growth rate (CAGR) of 11%. The transport services market outlook shows that growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$2.25 trillion in 2025 at a CAGR of 7%.

The global [general transport market](#) is segmented by type into sightseeing transport & support activities for transport, couriers and messengers, and postal services. Subsegments covered are scenic and sightseeing transport, support activities for transport, domestic couriers, international couriers.
