

# FieldMetrix Now Converting Sample Paper-Based Job Cards Into Electronic Reports for Free for New Clients

*An industry leader in software for businesses has expanded its services with a special deal for new clients.*

HOUSTON, TEXAS, UNITED STATES, January 21, 2021 /EINPresswire.com/ -- Representatives with [FieldMetrix](#) announced today that it is now converting sample paper-based job cards into electronic reports [for free for new clients](#).

"We're excited about this offer," said FieldMetrix CEO and Co-Founder Derek Mitchell. "Electronic forms and job cards eliminate accuracy errors and provide real-time results."

FieldMetrix, which recently celebrated 10 years in business, provides software that runs on the web and Android devices that enable companies to use mobile forms to capture data in the field. Data is visible in real-time on the company's web interface that captures inspection forms, equipment maintenance checklists, signatures, and more.

FieldMetrix's specialties include: customizable mobile forms, ad-hoc field data capture, reports, and assigning field tasks to mobile workers.

"We're offering this for free for new clients because customers seem to have a 'moment of truth' when they see their own job card or inspection list in PDF format with a picture, signature, and GPS fix," Mitchell said. "Your phone is increasingly becoming an important tool for business activities."

Mitchell went on to question, "Are your field technicians completing their work on their Android phones?" If so, Mitchell noted, "They can track SLA compliance and reduce the cost of time finding completed work. Imagine having the peace of mind knowing you have met your SLA goals, and your technicians have completed their work scheduled for today, and the PDFs of the job cards or maintenance work are already in your inbox."

Mitchell explained that FieldMetrix can create custom reports that allow for easier reading and understanding of what is really happening on the ground. This gives users the ability to respond more quickly and accurately using the information you have gathered in the field.

The company spokesperson reiterated that the PDF reports of all work done in the field are automatically emailed to clients or field service management within minutes of completion.

“You can customize the information displayed for proof of service or compliance regulations. This includes information such as work time stamps, GPS locations, or stock used,” Mitchell said. “It’s easy to replicate your current paper form with an electronic PDF customized to your requirements. If you would like us to show you what yours could look like, send us a copy of your job card to [support@fieldmetrix.com](mailto:support@fieldmetrix.com), and we will convert it.”
