

LG Networks Celebrates 10th Anniversary

LG Networks, Inc. celebrates a decade of helping small and medium sized businesses with their outsourced IT needs.

DALLAS, TEXAS, UNITED STATES OF AMERICA, January 25, 2021

/EINPresswire.com/ -- LG Networks,

Inc., a leading Dallas/Ft. Worth area

[managed service provider](#) (MSP),

celebrates a decade of helping small

and medium sized businesses with

their outsourced IT needs. As one of

the few remaining independently

owned MSPs, LG Networks has

achieved significant organic growth

since its inception in 2010. Today the

company oversees the [IT support](#) of

multimillion dollar organizations in

industries such as finance, healthcare, aerospace, pharmaceutical, cosmetics, and many others.

"I started LG Networks 10 years ago with a client-first philosophy and a firm commitment to delivering high quality managed IT service to our clients," said the company's founder and CEO, Lou Garcia. "Ten years later, this philosophy still remains as one of the company's foundational hallmarks."

LG Networks has grown from four original employees when it was founded in 2010, to now fifteen full time employees, nearly quadrupling in size. The company has also since moved from its previous location, a 700 square foot office space, to its current address at a premiere, luxury high-rise building located at 8111 Lyndon B Johnson Freeway in Dallas, TX. Later this year, LG Networks will celebrate another milestone as it moves its headquarters to a newly renovated 6,000 square foot office space within the same building.

LG Networks has also since earned Microsoft Gold Partner status, an accomplishment that only one percent of Microsoft partners worldwide ever achieve. This milestone is a testament to the company's strength of its expertise, and with the company's continued push to migrate its

existing clients to cloud platforms, LG Networks has become a leading provider of Office 365 and Azure solutions.

With the Covid-19 pandemic impacting small and medium sized businesses worldwide, LG Networks has been instrumental in getting its clients ready for remote working environments. Its clients have been able to leverage the company's cloud, computer networking, and Voice over IP expertise to not only survive but thrive during the difficult period.
