Some of the major factors for the rise of the mobile cranes market are the compactness and ease of convenience in small construction sites, especially in metropolitan areas. They require less space on sites for operating compared to other cranes. Moreover, the mobile cranes take extraordinarily little time to set up and also save the labour cost involved. The ongoing and upcoming infrastructural development in various countries and rapid urban growth are contributing to the increasing growth rate of the mobile crane market. The technology involved in operating the mobile cranes has developed vastly in recent years. It makes the cranes easier to operate and user-friendly making them a popular choice in the crane segment. Other factors like mobility, cost-effectiveness, increased power load, and easy availability are also aiding in the rise of the global mobile cranes market in the forecasted period.

The COVID-19 pandemic is expected to have a great impression on the global market. The rising knowledge regarding cost-effectiveness and timesaving at construction sites will encourage opportunities for the market. The elevated demand for mobile cranes has led to the deficiency of such products. The mounting need for manufacturers to raise their production capacities in this

crisis will further benefit the market. The increasing assumptions and concerns about the spread of the virus will boost the mobile crane's demand. Moreover, the long-term effect of the virus will simultaneously activate cautiousness among people, which, in turn, will anticipate reasonably for the market.

As an Analyst for Global Mobile Crane Market:
