

# Vascular Grafts Companies Invest In Technological Advances For Innovative Products

*The Business Research Company's Vascular Grafts Global Market Report 2020-30: COVID-19 Growth And Change*

LONDON, GREATER LONDON, UK, February 8, 2021 /EINPresswire.com/ -- New year, new updates! Our reports have been revised for market size, forecasts, and strategies to take on 2021 after the COVID-19 impact: <https://www.thebusinessresearchcompany.com/global-market-reports>

Companies in the vascular graft market are increasingly investing in technological advances for the development of innovative vascular grafts, including customization of vascular grafts. For instance, RelayPro, a thoracic stent graft system recently launched by Terumo Aortic, is a low-profile device designed for patients with smaller access vessels in the treatment of thoracic endovascular aortic repair (TEVAR). It offers a broad range of diameters, lengths, tapers, and proximal configurations to the physicians. Both bare stent and non-bare stent (NBS) versions are available for this device and it can be customized to meet the patients' specific anatomical needs. Such vascular graft market trends help advance the market.

The major players with [vascular graft industry shares](#) are B. Braun, C. R. Bard, Cardinal Health, Cook Medical, Endologix, LeMaitre Vascular, Medtronic Plc, Getinge, Terumo Medical Corporation, Gore Medical, Getinge AB, Lombard Medical, Becton Dickinson (C.R. Bard), Terumo Medical Corporation, Artegraft, Jotec GmbH, Heart Medical Europe BV, Japan Lifeline, Cardinal Health.

The global [vascular grafts market](#) was expected to decline from \$2.79 billion in 2019 to \$2.6 billion in 2020 at a compound annual growth rate (CAGR) of -6.98%. The decline was mainly due to the COVID-19 outbreak that has led to restrictive containment measures involving social distancing, remote working, and the closure of industries and other commercial activities resulting in operational challenges. The entire supply chain has been disrupted, impacting the

market negatively. The vascular graft market size is expected to recover and reach \$3.27 billion in 2023 at a CAGR of 8.02%.

Here Is A List Of Similar Reports By The Business Research Company:
