Master's Degree in Electrical Engineering and a Master's Degree in Business Administration from Santa Clara University. At Exegy, Arbaugh will continue to serve as the Company's Chief Operating Officer. He has previously led the Engineering, Service and Sales teams for the Company.

O'Donnell said, "The Board of Exegy is delighted to recognize Rod's many contributions to the success of our company over many years. He is a key leader in growing our business from ten employees and no sales as a start-up in 2004 to 135 employees and strong recurring revenues today. His commitment to delivering market leading service to our clients has been critical to our growth in revenue and profitability."

Taylor joined Exegy in 2005 after completing his PhD in Computer Engineering at Washington University in St. Louis. He will continue to serve as Exegy's Chief Technical Officer. He will also continue to lead the Company's product development efforts including the expansion of Exegy's proprietary hardware solutions using Field Programmable Gate Array (FPGA) technology and predictive trading signals derived from market data using machine learning and artificial intelligence tools in the Company's Signum division.

O'Donnell said, "David has contributed enormously to building our intellectual property portfolio over the years. Exegy now holds 140 US and international patents in our field and is considered

the technology leader in our industry thanks to David and his colleagues at Exegy. Both Rod and David are widely known in our industry and the largest trading banks, hedge funds and money managers in the world rely on their knowledge and leadership to help build the most performant trading systems in the world."
