

Combat Veteran Changes Mission from Protecting World Leaders to Keeping the World Safe with COVID-19 Detection Dogs

One of the nation's top celebrity dog trainers is set to play a vital role in keeping the world safe during the pandemic.

HUNTINGTON BEACH, CALIFORNIA, UNITED STATES, February 10, 2021 /EINPresswire.com/ -- Combat Veteran Ryan Matthews announced today that he has changed his mission from protecting world leaders to keeping the world safe with his upcoming COVID-19 detection dogs program.

"I'm leveraging the same skills I learned training elite Army dogs," said Matthews, founder, CEO, and spokesperson for [World of Dog Training](#). He graduated from Lackland Air Force Base in San Antonio TX in 2002, becoming a certified Military Working Dog Handler.

Matthews' decision to keep the world safe with COVID-19 detection dogs program could prove to have perfect timing. According to [experts](#), COVID-sniffing dogs are the new tool in helping detect and control the spread of the COVID-19 virus.

In fact, one example is that ticket holders at the [Miami Heat basketball games](#) are now screened by COVID-19 detection dogs when they arrive.

"Dogs can search a person and clear them or give a positive response in seconds, resulting in little to no bottlenecking at events," Matthews said. "It's extremely cost effective to hire a COVID-19 detection dog team, because an organization can effectively search hundreds or thousands of people for pocket change per person."

Matthews went on to point out that COVID-19 detection dogs are extremely reliable. In fact, a Belgian Malinois in Germany trained at the Hanover University of Veterinary Medicine is now detecting COVID-19 with 94 percent accuracy (<https://newsinfo.inquirer.net/1391913/german-sniffer-dogs-detect-covid-19-with-94-accuracy>). Matthews noted that his canines, during military

training, were expected to maintain a 95 percent proficiency success rate and the same results can be obtained with the right COVID-19 detection dog team.

"A dog doesn't care what odor it is being trained to sniff, whether its narcotics, cancer, explosives, or odors associated with COVID-19," said Matthews and added, "Once trained, COVID-19 detection dogs provide reliable and efficient results.

Matthews, also a former combat K-9 handler - an alumnus of the Wounded Warrior Project, and a volunteer for the Youth Motivational Speaker Taskforce and The Mission Continues, explained that anyone interested in his services can schedule a call today (<https://bookme.name/ryanmatthews>).

Matthews added that the difference between good and great is in the details; therefore, the organization needs to think of all aspects beyond their immediate needs.

"Organizations and corporations are encouraged to consider using COVID-19 detection dogs as a layer of protection for populated events such as sporting events, concerts, allowing schools to open up – and any place of large gathering while still maintaining social distancing," Matthews said. "When combined with other safety protocols such as medical stations, as an example, we have a better chance at bringing society around the world back to a new normal."
