

Two Exclusive Interviews Release with Pfizer and Novo Nordisk ahead of Pharma Microbiology East Coast Virtual Conference

SMi Reports Two exclusive interviews with Lacey Batts at Novo Nordisk and Joanny Salvas at Pfizer speaking at 4th Annual Pharma Microbiology East Coast released

BOSTON, MA, UNITED STATES, February 11, 2021 /EINPresswire.com/ -- The [Pharmaceutical Microbiology Conference East Coast Virtual Conference](#) will be commencing on 28th and 29th April 2021 and will focus on implementing robust sterility assurance strategies for effective contamination control.

[SMi Group](#) caught up with Lacey Batts, QC Biochemist II, QC Microbiology & Biochemistry T Novo Nordisk and Joanny Salvas, Manager, PAT Projects at Pfizer.

Lacey Batts as a Biochemist II (Microbiologist II) in QC at Novo Nordisk Pharmaceutical-Site Clayton, works with the Cleaning Validation team (as well the Clean Utilities team) as the direct representative for all water testing. Lacey aids in planning and preparation for all current and future cleaning validation activities and is currently involved in several method transfers/validations along with routine testing within the department.

Joanny Salvas has a bachelor's degree in biotechnological engineering and a master's in applied sciences (Chemical engineering). She has been developing and implementing Process Analytical Technologies for more than 10 years at Pfizer, both in Solids and Sterile Injectable processes.

Here is a [snapshot of what was discussed](#):

What is the greatest challenge for you to personally overcome within the pharmaceutical microbiology field currently?

Lacey's Answer: ' Currently I am working in a finished product facility and the project lead for Microbiology in our sister oral product facility. It has definitely been a challenge to facilitate

between the 2 facilities in regard to communication, testing procedures/specifications and managing and coordinating all the different activities between all the different departments at the 2 facilities.'

The pharmaceutical microbiology industry has matured significantly in previous years, what key developments have you witnessed in the last year within the field?

Joanny's Answer: "The adoption of alternative and rapid microbiological method has increased significantly recently. We see interest and support from the different Boards of Health and auditors for the adoption of these methods (when properly developed and validated, of course!) and this is greatly encouraging!"
