

Bold New Book Pandemic Blunder Shows How Government Caused Over 300,000 Preventable Covid Deaths

The government has blocked early proven, cheap and effective home treatment and prevention that keeps people out of hospital.

CHEVY CHASE, MARYLAND, UNITED STATES, February 12, 2021 /EINPresswire.com/ -- A huge amount of data and information not covered by mainstream media are in [Pandemic Blunder](#) that tells the story of how over 300,000 Americans have died from [COVID](#)-19 unnecessarily because the government has blocked early home treatment and prevention.

About the Book: Pandemic Blunder contains considerable medical information and data to support a number of proven safe, cheap generic medicines and protocols that knock out the coronavirus when given early. Read about the pioneering, courageous doctors who have been using innovative approaches to prevent their COVID patients from needing hospital care and facing death. The book includes many expert opinions from doctors who support the view that 70 to 80 percent of COVID deaths could have been prevented—and still can be.

Don't be victimized by disinformation and propaganda from leftist media. Learn how corrupt forces are aiming to make billions of dollars from expensive medicines and vaccines, and how hundreds of thousands of deaths could have—and should have—been prevented!

About the Author: Dr. Joel S. Hirschhorn has a long history of working on health issues. He was a full professor at the University of Wisconsin, Madison, where he directed a medical research program between the colleges of engineering and medicine. As a senior official at the Congressional Office of Technology Assessment and the National Governors Association, he directed major studies on health-related subjects, including health risks from toxic waste sites, and he testified at over 50 US Senate and House hearings. His nonfiction books include From Pollution to Prevention, Sprawl Kills, and Delusional Democracy, and he has authored hundreds of articles in journals and on websites, plus op-ed articles in major newspapers. Dr. Hirschhorn has served as an executive volunteer at a major hospital for more than 10 years and is an advisor to several organizations promoting patient-centered care. He is a member of the

Association of American Physicians and Surgeons, and America's Frontline Doctors.

Synopsis

Pandemic blunder is defined as the failure of the United States public health system and federal agencies to support and promote early home/outpatient treatment for the COVID-19 pandemic disease. Considerable medical information and data convincingly show that when given early a number of proven safe, cheap generic medicines and protocols knock out the coronavirus. Early means within the first few days of getting symptoms or a positive test. Some pioneering and courageous doctors have been using innovative approaches to prevent their covid patients from needing hospital care and facing death. Many expert views of doctors support the view that 70 percent to 80 percent of covid deaths could have been prevented – and still can for future victims of the disease. Learn how hundreds of thousands of deaths could have and should have been prevented.

This book does more than describe the pandemic blunder, particularly in terms of the influence of Dr. Anthony [Fauci](#). It can help Americans protect their lives by not being victimized by disinformation and propaganda from leftist media. Pandemic management has failed because of corrupt forces aiming to make billions of dollars from expensive medicines and vaccines. There has been a widespread dereliction of duty on the part of many local, state, and federal government officials.
