

STP ComplianceEHS (STP) announces the release of its recently updated EHS audit protocol for Taiwan

Latest EHS Regulations Updates Assist Companies to Achieve EHS Compliance

VANCOUVER, BRITISH COLUMBIA, CANADA, February 12, 2021 /EINPresswire.com/ -- STP ComplianceEHS (STP) announces the release of its recently updated EHS audit protocol for Taiwan. This audit protocol, which covers relevant national EHS requirements, was previously updated in October 2018. The regulatory date for the current release is November 2020.

Leading companies around the world use IAPC EHS audit protocols to understand the scope of their EHS regulatory obligations and rapidly collect, share, archive, and export audit findings in a cost-effective manner. IAPC EHS audit protocols are focused on those national (plus, in some cases, regional or provincial) EHS requirements that have site-specific application for manufacturing operations. As a leading EHS management consulting firm with a global network of experienced EHS teaming partners, STP has in-depth knowledge and technical expertise of local/regional EHS requirements.

STP maintains leading-edge EHS audit protocols for more than 50 jurisdictions. The protocol documents are written in English and are available in MS Word, Adobe Acrobat, and Excel formats, as well as through STP's web-based portal or can be integrated into an existing company platform. Using the protocols' custom templates and advanced functionality features, auditors can easily track audit findings and manage data over time to improve compliance, risk management, and safety performance. In addition, STP's formatting is compatible with leading risk management and sustainability platform providers.

Highlights of selected new legislation:

- Management Measures for Concerned Toxic Chemical Substances 2020 was added and introduces new requirements regarding concerned toxic chemical substances, including operation management of those substances.

- Regulation on Female Employee Maternal Health of 16 September 2020 was added and introduces requirements for female employees and imposes requirements regarding maternal health methods to protect pregnant employees.

- Regulation on Air Pollution Violation in Poor Air Quality Period of 6 February 2020 was added and lists prohibited operation activities during times when poor air quality alerts have been issued.
