

Nutri-Score Labels - On Demand, Using Your Thermal Printer.

RevealPrint is a great option of printing Nutri-Score or other food marking labels using your thermal printer.

EASTON, PA, USA, February 16, 2021 /EINPresswire.com/ -- RevealPrint technology has been identified as an excellent solution for [Nutri-Score labels](#). The colors can be incorporated into a stand alone label or used as part of a scale label. This allows anything packaged in a store or processing facility and labeled with a direct thermal label to include the Nutri-Score information. RevealPrint can also be used to identify allergens in food - highlighting "NUTS" or "DAIRY" - on demand, only when required.

RevealPrint is a chemical free alternative to traditional direct thermal labels that has the added advantage of allowing on-demand color to be added to labels. According to John Guzzo, "Because the labels are BPA/BPS/Phenol and leuco dye free, they are safe for use around [foods](#) and are easily recycled. The best part is that RevealPrint works with existing printers and software - no investment to take advantage of on demand color" Visit the RevealPrint [website](#) to "see" how RevealPrint works.
