

AODocs Collaborates with Maven Wave and LumApps on “Google Workspace for the Way You Work” Webinar

AODocs, Maven Wave, & LumApps join with Google to demonstrate how re-platforming from SharePoint adds workforce automation functionality within Google Workspace

ATLANTA, GA, UNITED STATES, February 25, 2021 /EINPresswire.com/ --

AODocs, the only [business process platform tightly integrated with Google Workspace](#), along with fellow Google Cloud Partners [Maven Wave](#) and [LumApps](#), today announced their participation in the upcoming webinar, “Google Workspace for the Way You Work: Replatforming SharePoint,” which will be taking place on Wednesday, March 10, at 1 PM EST.

Maven Wave, an Atos company, helps the world’s largest enterprises best transition to the Google Workspace (formerly G Suite) platform. Significant gains to productivity and efficiency are realized for these customers when AODocs is deployed to improve business processes. Maven Wave and AODocs teams partner to enhance the digital transformation journey by improving enterprise workflows and by better organizing and securing business documents and assets.

“

AODocs (provides) the business process and document control platform (companies) need, allowing these companies to bring all their users and content, even the most sensitive part, to Google Workspace.”

Stéphan Donzé, CEO AODocs

SharePoint environments often suffer from outdated, disparate, and disorganized deployments. This creates confusion and frustration for team members, as well as reduced efficiencies, causing headaches for business

leaders once these conditions are exposed. As this is an especially acute problem for midsize and larger organizations (5,000+ employees), IT staff supporting such environments are encouraged to attend.

The webinar features John MacDonald, North American Practice Director, Productivity & Collaboration, Google Cloud.

Mr. MacDonald will be joined by Stéphan Donzé, CEO of AODocs; Derrick Nadonga, Principal Solutions Engineer, Maven Wave; and Joey Levi, Director Pre-Sales North America, LumApps.

"Many companies want to adopt Google Workspace to transform the way their employees collaborate, but they are concerned about the workflows and business documents, oftentimes mission-critical or required for compliance, that they have in SharePoint or other legacy systems", says Donzé, "AODocs addresses these concerns by providing the business process and document control platform they need, allowing these companies to bring all their users and content, even the most sensitive part, to Google Workspace."

Discussion in the webinar will center on the following topics:

Common myths about SharePoint

Addressing the total cost of SharePoint

Intranet and content solutions for Google Workspace

SharePoint to Google Workspace migration customer stories

"We've helped hundreds of large enterprises streamline clunky, inefficient workflows and unleash their team's true potential with Google Workspace," said Derrick Nadonga, Principal Solutions Engineer at Maven Wave. "We're looking forward to relaying actionable insights from those deployments."

"LumApps digital workplace platform combined with Google Workspace allows all employees to be more productive, access to relevant information and support business challenges in their daily jobs", says Joey Levi, Director Pre-sales North America for LumApps.
