

PSS Urology Announces Exciting New Bladder Cancer Initiative with PreCise Ultrathin

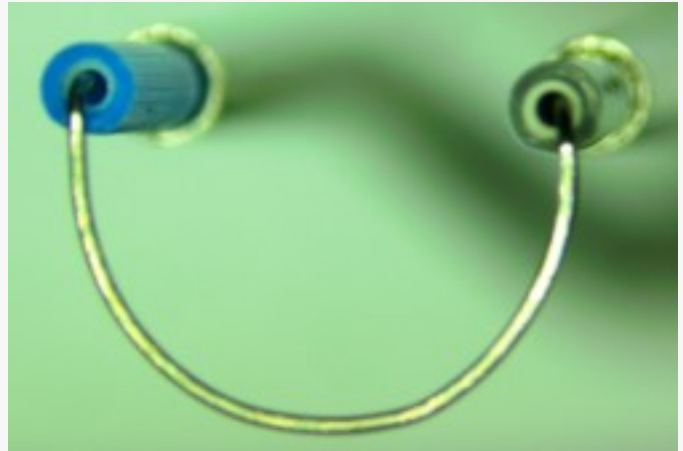

PSS Urology launches a specialized PlasmaBipolar Electrode for Bladder Cancer Treatment

SPOKANE, WA, USA, February 24, 2021 /EINPresswire.com/ -- Bladder Cancer is a huge and growing challenge globally. Bladder cancer ranks as the sixth most common cancer worldwide with 1,650,000 prevalent cases (5-year prevalence rate), 550,000 new cases and almost 200,000 deaths annually in 2018.

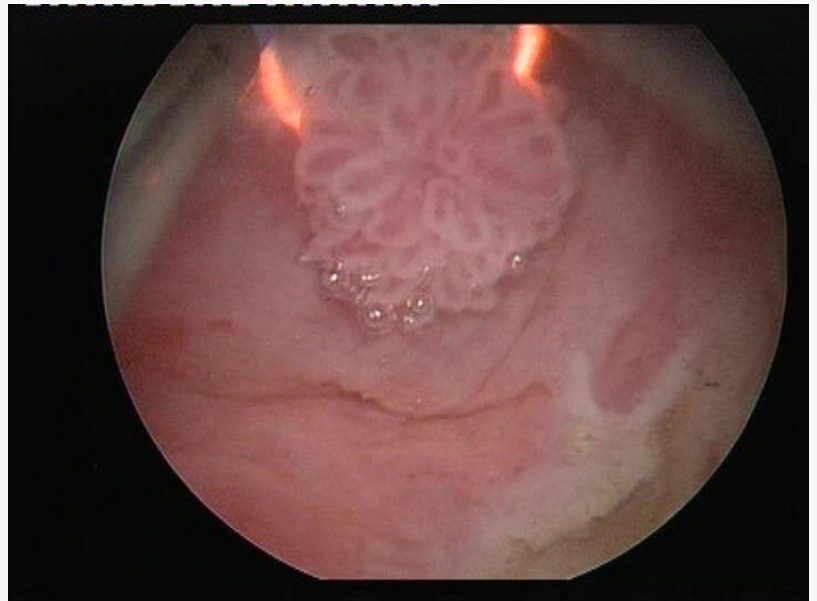

Approximately 75% of all bladder cancer cases occur in men. It has a high recurrence rate with an average of 61% in year one and 78% over five years.

[PSS Urology](#) recently Launched the PreCise UltraThin™ PlasmaBipolar Loop Electrode to assist Urologists in treating Bladder Cancer

- The PreCise UltraThin™ utilizes a superior Gen II Alloy developed by PSSU to create a more precise bipolar loop for bladder tumor resection and bladder cancer staging
- The PreCise UltraThin™ is highly effective at much lower cut/coag settings, further increasing precision with decreased thermal effect for improved pathology
- Surgeons evaluating the PreCise UltraThin™ herald it as an exciting new tool for the treatment
