Anacomp and Exonar Announce Strategic Partnership to Deliver Intelligent Data Discovery Services in U.S.

CHANTILLY, VA, UNITED STATES, February 25, 2021 /EINPresswire.com/ -- Anacomp, Inc. (OTCBB: ANMP), a leading provider of technology-based records and data governance solutions and Exonar Limited announced a formal partnership agreement to deliver intelligent data discovery services to the U.S. federal government agencies and commercial organizations. All organizations face both the challenge and opportunity of owning large quantities of data and implementing a strong data management and governance strategy. By combining Anacomp's specialized expertise and experience implementing records management solutions with Exonar's world-leading data discovery software we can capture, classify and index large data estates efficiently.

Thomas Cunningham, Anacomp CEO, commented, "The addition of Exonar to our Data Discovery and Distillation (D3) service offering is a keystone to delivering intelligent automation support for records governance, cloud migration and digital transformation initiatives for our government and commercial customers. With Exonar's Reveal platform we offer our customers the powerful ability to build a complete index of billions of data items, particularly unstructured data, to achieve regulatory compliance and privacy protection."

Exonar's CEO, Danny Reeves, added, "By combining our data discovery capabilities with Anacomp's proven success in the Federal Government and commercial space, we look forward to helping organizations improve business processes, reduce costs and achieve compliance."
Both parties are excited about this new partnership and the many potential benefits it holds for federal agencies and commercial customers.
