

(Stock Symbol: BGDAF) Boasts an Impressive Mining Team Focused on Proven Precious Metals and Diamond Sites

Brigadier Gold Limited (OTC: BGDAF) (TSXV: BRG) based in Vancouver, BC, was formed to leverage the next major bull market in the natural resource sector

GARIBALDI HIGHLANDS, BRITISH COLUMBIA, CANADA, March 1, 2021

/EINPresswire.com/ -- Brigadier Gold Limited ([Stock Symbol: BGDAF](#)) Boasts

an [Impressive Mining Team](#) Focused on Proven [Precious Metals and Diamond Sites](#); Over \$4 Million Funding in Place

“

We continue to make excellent progress at Picachos and 2nd rig will help a lot. The Cocolmecca vein structure is strongly mineralized. We look forward to expanding the depth and strike length in 2021”

Ranjeet Sundher

- Well Positioned Precious Metals Explorer with Very Experienced Management.
- Promising Properties Under Development in Canada and Mexico.
- Drill Program is Fully Funded with \$4.2 Million Raised Since June, 2020.
- Recent Settlement Resulting in \$100K of Indebtedness Retirement.
- Latest Drilling and Surface Sampling Results Indicate Primary Vein System Contains Over 7 Kilometres of Robust Mineralization in Gold & Silver.

Brigadier Gold Limited (OTC: BGDAF) (TSXV: BRG) (FSE:

B7LM), based in Vancouver, BC, was formed to leverage the next major bull market in the natural resource sector, particularly precious metals. The BGADF company mandate is to acquire undervalued and overlooked mining projects with demonstrable potential for advancement. Led by a management team with over 100 years of collective experience in mineral exploration and capital markets development, BGADF is focused on advanced exploration opportunities in politically stable jurisdictions with current operations in Mexico and Canada.

BGADF is currently focused on a first-ever diamond drill program on its 100% controlled Picachos project in mineral rich Mexico, targeting mineralized veins underneath and surrounding the historical high grade San Agustin gold mine located on the property. The BGADF diamond drill program, led by veteran geologist Michelle Robinson, is fully funded with \$4.2 million raised since June of 2020.

The BGADF Picachos land package was methodically assembled by Michelle Robinson (MAsc, PEng, geologist, 43-101 QP) over 10 years ago. Ms. Robinson has worked in Mexico for over 20 years with a number of major mining companies. She has authored over 20 technical reports and published several papers for the Society of Economic Geologists. Ms. Robinson and her team are executing on the company's 5,000-metre diamond drill program -- the first ever on this project.

□BGADF Adding Second Drill Rig for Commencement of Phase Two Diamond Drilling at Picachos High Grade Gold-Silver Property

On February 19th BGADF announced its planned addition of a second drill rig in connection with commencement of phase-2 diamond drilling at its Picachos gold-silver project, Sinaloa Mexico. BGADF also intends to complete a private placement for gross proceeds of up to \$1,000,000. The additional rig will help considerably in accelerating the company's investigating of the many high priority existing and newly identified targets.

□Phase-one exploration results at Picachos provided several highlights, including:

- Confirmed seven-kilometre long vein system of precious metals mineralization.
- Widely spaced holes show vein continuity on strike and at depth with robust width.
- High grade nature of precious metals mineralization consistently observed in assays.

B G Brigadier Gold Limited

TSX Venture: BRG
OTC: BGADF
Frankfurt: B7LM

"I'm pleased that the vision I had when assembling this project over many years is starting to take shape," said Michelle Robinson, Picachos Chief Geologist. "As good as the assays were in BRG-001 the drill appears to have cut through old underground workings reducing the potential reported overall width of mineralized material. With 40-holes and 5000 metres of drilling in this program, I'm confident we will continue to add significant value to the project".

BGADF LOGO

- Confirmed meaningful gold/silver mineralization in hanging wall and footwall of vein systems.
- Discovered previously unexplored high-grade gold and silver historic workings.
- Multiple new surface and subsurface targets discovered during reconnaissance and mapping.
- Copper porphyry target sampling suggests high priority follow-up exploration.

The BGADF Picachos land package was methodically assembled by Michelle Robinson (M.A.Sc., P.Eng., Geologist and Qualified Person as defined by National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101")) over 10 years ago. Michelle is a respected industry veteran who has worked in Mexico for over 20-years with a number of major mining companies. She has authored over 20 technical reports and published several papers for the Society of Economic Geologists. Michelle and her team are executing on our 5,000-metre diamond drill program - the first ever on this project. The project's location, situated 25 kilometres equidistant from two recent bonanza grade discoveries of Vizsla Resources and GR Silver and along the same mineralized trend, positions Picachos as a truly exciting opportunity for Brigadier Gold and our shareholders.

BGADF also announces a non-brokered private placement financing of up to 5,000,000 units (the "Units") at a price of \$0.20 per Unit for gross proceeds of up to \$1,000,000 (the "Offering"). Each Unit is comprised of one common share in the capital of the Company (each a "Common Share") and one Common Share purchase warrant (each a "Warrant"). Each Warrant entitles the holder thereof to purchase one Common Share for \$0.30 for a period of one year from the date of

Brigadier (TSXV: \$BRG | OTC: \$BGADF) Provides Update on Exploration at Picachos; Current Program to Include Drilling of Prospective #Copper Targets "We are excited to move into 2021 with a solid blueprint to advance Picachos."

issuance. The Company may pay a 7% finder's fee, payable in cash and finder's warrants (each a "Finder's Warrant"), in connection with the Offering, to qualified non-related parties, in accordance with the policies of the TSX Venture Exchange (the "Exchange"). Each Finder's Warrant will entitle the holder to purchase one Common Share for \$0.30 for a period of one year from the date of issuance.

Proceeds from the Offering will be used to fund exploration at the Picachos and Killalla Lake properties, corporate marketing campaigns and general working capital purposes.

▣BGADF Completes Debt Settlement

On February 11th BGADF it has received approval from the TSX Venture Exchange to complete the debt settlement with one arm's length creditor. The Debt Settlement resulted in an aggregate of \$100,000.00 of indebtedness being retired in consideration for the issuance of 454,545 common shares at a price of \$0.22 per share. The Debt Settlement did not result in the creation of a new insider or control person. The common shares issued under the Debt Settlement are subject to a four-month resale restriction expiring June 12, 2021.

▣Drone Magnetic Survey on Killalla Lake Diamond Property

On January 27th BGADF announced the completion of a drone magnetic survey on its Killalla Lake Diamond Property. Previous work by the Wahl Group (Rudolf Wahl and Mike Dorval) led to the discovery of the Madonna Diamondiferous dike. Diamonds were first located on the Property in 2006 when Dianor Resources Inc. had Kennecott Canada Exploration Inc.'s Minerals Processing Laboratory complete dense media separation of a 1205.8 kilogram sample of the dike. The sample produced 66 micro diamonds. Subsequent to the recovery of the diamonds the claimholder completed a diamond drill program that intersected the Madonna dike and another dike thought to be genetically related.

BGADF as an option to acquire a 100% interest in the property, which consists of forty-six (46) cell claims units located in Killalla Lake, Foxtrap Lake Area Townships, Thunder Bay Mining District, Ontario, subject to reservation of royalties in favor of the Wahl Group.

The results of the drone survey have produced interesting magnetic features that will be assessed in the spring by prospecting, sampling and possible stripping. The property has potential to host additional diamond bearing dikes. The continued exploration of the Madonna dike and other dikes will provide insight on the diamond content, petrography, and minerology occurrences.
