

# EDRM Announces Ankura as Newest Partner

MINNEAPOLIS, MINNESOTA, UNITED STATES, March 2, 2021

[/EINPresswire.com/](https://www.einpresswire.com/) -- Setting the global standards for e-discovery, the Electronic Discovery Reference Model (EDRM) is pleased to announce Ankura Consulting Group LLC, a global business advisory and expert services firm, as its newest partner.

Among the EDRM opportunities and resources available to partners such as Ankura is the development and promotion of thought leadership and best practices in e-discovery, the

distribution of unique content and the engagement of a global community comprised of knowledgeable, multidisciplinary professionals contributing to enhance e-discovery, privacy, security and information governance frameworks, processes and standards.

“

Our EDRM community is excited to partner with Ankura and to learn more about their innovative research applied to today's legal data challenges.”

*Mary Mack, CEO, EDRM*

“My clients have benefited from the research Ankura and my Sidley team have done to ground our legal intuition in transparent analytics,” said Robert Keeling, partner and co-chair of the eDiscovery Group at Sidley and EDRM's chair of the global advisory council. “The research not only grounds the legal intuition but also debunked some popular e-discovery myths.”

“Ankura is keenly focused on bringing advanced analytics transparency to the legal community,” said Mary Mack,

CEO and chief legal technologist at EDRM. “Our EDRM community is excited to partner with them and to learn more about their innovative research applied to today's legal data challenges.”

This partnership provides Ankura access to the global EDRM community, comprised of 33% corporations, 30% law firms and 23% software and service providers in 113 countries across six continents.

Setting the global standards for e-discovery

Ankura

“We are excited to collaborate with the EDRM to help further bridge the gap between the legal community and academic research that studies the effectiveness of deploying advanced analytics on data in legal matters,” said Nathaniel Huber-Fliflet, senior managing director at Ankura Consulting Group. “We are looking forward to participating in an open and thoughtful dialogue about legal technology and helping drive analytics best practices in the industry.”

For those interested in an emerging technology-assisted review issue – the belief that machines are “just as good as” lawyers and that the machines’ results are superior to that of lawyers – Ankura and co-authors at AT&T Services, Inc. and Sidley Austin LLP will present their new research showing that predictive coding is not simply “better than” humans. Please save the date for April 14 at 1 p.m. EDT.

#### About Ankura
