The dry bulk material trucking market is increasingly using technology for higher output and efficiency which is gaining significant popularity in the dry bulk cargo market. The use of technology includes artificial intelligence, automation, the use of apps, and others. For instance, in April 2020, Roger, a technology company for trucks has developed an app that will provide real-time information about the status and location of all their current loads boosting the efficiency of the businesses. The technology reduces information generation time, digitizes paperwork, tickets, and back-and-forth communication. The app will have features such as paperless tickets, fast digital payment processing, integrations with major industry ERPs, and a digital freight marketplace.

The dry bulk materials trucking market consists of sales of dry bulk materials trucking services by entities (organizations, sole traders, and partnerships) that provide over-the-road transportation of dry bulk materials. Only goods and services traded between entities or sold to end consumers are included.

The global dry bulk materials market is expected to grow from \$284.86 billion in 2020 to \$306.53 billion in 2021 at a compound annual growth rate (CAGR) of 7.6%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which

had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$389.46 billion in 2025 at a CAGR of 6.2%.

The dry bulk materials trucking market covered in this report is segmented by commodity type into iron ore, coal, and pet coke, grains and agricultural products, cement/ aggregates, fertilizers, others, by application into food and beverages, construction, automotive, energy and mining, agriculture, chemicals, others.
