

# Newton Running Releases Spring 2021 Line with Focus on Sustainability

*Integrating recycled plastic bottles, and EcoPure®, Newton Running Releases eco-friendly Annual Spring 2021 line to Support the UN Global Compact initiative*

BOULDER, CO, UNITED STATES, March 11, 2021 /EINPresswire.com/ -- [Newton Running](#), an athletic shoe brand focused on making responsive shoes for outdoor and running enthusiasts, is excited to announce the launch of their Spring 2021 Line.

2021 marks their second year as active members of the [UN Global Compact](#) and a commitment to their 10 principles in the areas of human rights, labor, environmental responsibility, and anti-corruption.

Newton's next generation marks a major stride in the brand's sustainability initiative. They currently power their office and warehouse space entirely with wind energy and recycle or compost 95% of all the waste they generate.

For Spring 2021, Newton Running has re-engineered both the men's and women's Gravity 10, Motion 10, Distance 10, and Distance S 10 to be crafted entirely from recycled or biodegradable materials, all without sacrificing performance.

NEWTON RUNNING MOTION 10

NEWTON RUNNING GRAVITY 10

Newton is taking plastic bottles out of landfills, and utilizing them in the laces and upper mesh of each shoe. Each pair will use 4 water bottles worth of recycled plastic. The soles also feature [EcoPure®](#), a biodegradable plastic additive that is designed to help reduce the amount of waste and plastics in our environment.

An average shoe can take upwards of 40 years to biodegrade. However, Newton's Motion 10, for example, is specially treated to break down into nontoxic biomass & biogas up to 75% quicker in landfills while not compromising quality, durability, or performance in any way.

In 10 years, only biomass and biogas remain. The biogas can be used to create clean energy and the biomass turns into non-toxic dirt. The shoeboxes are even entirely compostable.

The Spring 2021 Line, the first release of what will prove to be an innovative year for Newton, is a major step towards creating a more sustainable future for the brand, runners, and outdoor enthusiasts.

#### About Newton Running:

Newton Running creates performance shoes specifically for runners and outdoor recreationists. Headquartered in Boulder, Colorado, Newton Running was built for runners by runners and strives to help athletes improve their form and abilities. Learn more at [www.NewtonRunning.com](http://www.NewtonRunning.com).

#### About UN Global Compact:

The UN Global Compact aims to mobilize a global movement of sustainable companies and stakeholders to create a better world. Through ten key principles in the areas of human rights,
