

Maximizing Survivability Signatures of Armored Platform through Integration of Advanced Multi-Layered Protection Systems

SMi Reports: briefings from senior US officers discussing the integration of vehicle protection systems and the capability requirements for US armored vehicles.

LONDON, LONDON BRIDGE , UNITED KINGDOM, March 16, 2021

/EINPresswire.com/ -- As armed forces continue to prioritise dealing with near-peer adversaries, and with passive [protection](#) measures reaching their physical limit, integrating advanced vehicle protection systems, and particularly active protection systems (APS), as a means of improving survivability signatures continues to grow in importance.

Future Armored Vehicles: Protection Systems USA 2021

The two-day Future [Armored Vehicles](#): Protection Systems USA virtual conference will provide briefings which will include insight into Modular Systems and architecture, Hard-Kill and Soft-Kill technology, layered approaches to survivability and battle proven systems.

The brochure with the full agenda and speaker line up for the main conference is available to download: <http://www.fav-aps.com/einpr2>

BENEFITS OF ATTENDING:

- Hear from industry leaders testing, developing and applying the cutting-edge technology that will be used by armored brigades for years to come
- Network with the field-leading decision makers, who will define the future of vehicle protection systems and the experts who will define the future of technology
- Understand the progress made, and the lessons learned from integrating cutting edge Active

Protection Systems from senior officials

- Discuss a diverse range of topics including hard and soft kill technology, creating a modular and sophisticated open system architecture, platform specific considerations, and much more!

Register at <http://www.fav-aps.com/einpr2>

Attendance is FREE for military and government personnel, \$499 for International and just \$999 for commercial organisations.
