

# BRMi Becomes Elite UiPath Service Network Member

*Membership Recognizes BRMi's Advanced Delivery Skills*

SILVER SPRING, MARYLAND, UNITED STATES OF AMERICA, March 16, 2021 /EINPresswire.com/ -- [BRMi](#) has been accredited by global software provider [UiPath](#) as a member of its UiPath Services Network, or "USN." USN recognizes an elite network of service delivery partners accredited with advanced delivery skills on par with the UiPath Professional Services team.

USN [UiPath Services Network membership] really identifies BRMi as a leader in the field of intelligent automation across all spectrums of delivery."

*Trevor Brown, BRMi Senior Director for Technology*

As a member of the USN, BRMi has proven its competency, its success via client references, and its knowledge and use of best practices. The company, which formalized a strategic partnership with UiPath in 2018, is now officially considered able to deliver state-of-the-art [robotic process automation](#) implementations consistently and with "know-how" equivalent to UiPath's own professionals.

"I'm proud to say BRMi is in the USN. It was a significant effort, signaling our commitment to the business relationship we have with UiPath," said Trevor Brown, BRMi Senior Director for Technology. "While we knew our capacity and were confident in ourselves, USN really identifies BRMi as a leader in the field of intelligent automation across all spectrums of delivery. Our business analysts, developers, architects, and infrastructure support teams were integral in the accreditation, which had a rigorous and comprehensive assessment process. I am especially grateful for the expertise and dedication of our team to this achievement," added Brown.

According to BRMi's President, Mike Battle, "It's another win-win. The value proposition with USN accreditation is tremendous. Our clients can rest assured that they are receiving the most professional service capabilities in business analysis, optimization, and system integration to fully automate an enterprise, if need be, with all the strengths of UiPath's market-leading, open, extensible, end-to-end automation suite. We're bringing the right solutions, with scalability and options, for the client environment."

The USN accreditation is the latest step in a steady series of automation capability and growth-related moves for BRMi over the last few years. It comes on top of the UiPath Advanced Developer Certification received by multiple BRMi technologists in March 2020.

## About BRMi

Founded in 2004, BRMi is a privately held, minority-owned IT services company supporting both government and commercial customers. Its services include applications, business optimization, advisory, operations, and applied information sciences. The company has specific technology expertise in a number of areas, including intelligent automation.
