# Cloudstar Adds Two Additional Failover Data Centers

Offering real-time fail-over options to keep their customers connected to their data and systems, nationwide

JACKSONVILLE, FL, US, March 19, 2021 /EINPresswire.com/ -- Cloudstar Adds Two Additional Failover Data Centers

Cloudstar is pleased to announce the addition of two additional data centers for the purpose of providing real-time fail-over options to its customers. The data centers, located in both Phoenix,

Cloudstar Logo

Arizona and Atlanta, Georgia were selected for their geographic locations, and proximity to high speed fiber routes.
Cloudstar, a Zerto Service Provider (ZSP), offers customers the ability to replicate files, virtual machines, and workloads in real time. In the event of a service disruption, the customer's entire server infrastructure can be instantly transferred to an backup data center facility in minutes, with near zero data loss said Gregory McDonald, CEO of Cloudstar.

> Working hand-in-hand with our customers to develop a comprehensive cyber-security & disaster recovery plan to meet or exceed regulatory guidelines is what we do best"
>
> *Christopher Cury, EVP of Customer Experience*

Because Zerto is a continuous data protection (CDP) solution which continuously journals all changes, customers can restore an entire environment to virtually any point in time – instantly. Customers now enjoy the flexibility to choose their backup data center location from any of the following six states – California, Arizona, Georgia, Colorado, Florida, and New Jersey.

"Working hand-in-hand with our customers to develop a comprehensive cyber-security & disaster recovery plan to meet or exceed regulatory guidelines is what we do best." said Christopher Cury, EVP of Customer Experience. "The more our customers view the relationship

as a partnership, or an extension of their team, the better the results".

While nobody wants to think about downtime, ransomware, regional Internet outages, DDoS attacks, data corruption and state sponsored cyber-crime remain the top reasons for unplanned downtime. Cloudstar remains committed to helping its customers embrace these challenges and plan for the unexpected.
