

Jessup's New Anti-Slip Grip Tape Optimizing Workplace Safety in Wet, Muddy and Greasy Environments

Commercial boat operators, oil rig operators, farmers and construction companies now have a new ally in Jessup's new Safety Track® 3236 Ruff -N-Tuff™ Grit.

MCHENRY, IL, UNITED STATES, March 19, 2021 /EINPresswire.com/ -- Touted as the Grip that is Dead Serious about Life Safety, [Ruff -N-Tuff™](#) is an anti-slip tape engineered to withstand the harshest environments. The product was designed specifically for use on commercial workboats and outdoor heavy-duty equipment on farms, construction sites as well as oil rigs and lifts that are often exposed to salty ocean spray, mud and grease.

Ruff -N-Tuff™ is an anti-slip tape engineered to withstand the harshest environments.

Far from the typical [anti-slip tapes](#) that shreds easily, Ruff-N-Tuff™ is built to last using heavy-duty aluminum oxide grit, a tough polyurethane coating and an exceptionally strong adhesive.

[Jessup](#) is a global manufacturer recognized worldwide for its expertise in adhesive coatings. When asked about the motivation for engineering this new product, Bill Bruhn, product manager who leads Jessup's product development and innovation process, said, "Our research revealed an ongoing market need for an anti-slip product with lasting durability, is multi-functional, installs easily, and has a much lower price point than traditional anti-slip systems such as gritted paint."

Ruff-N-Tuff™ is one of the most rugged anti-slip tapes available on the market; however, despite its hardness, the anti-slip tape is as easy to install. "But it is important to install per our instructions," said Bruhn, adding the key is ensuring the surface is clean and then simply peel, stick and go. Ruff -N-Tuff™ is available in 60' and 30' rolls and 6" x 24" treads. For further information, visit; jessupmfg.com or call 1-888-711-7735 to place an order.
