LONDON, UNITED KINGDOM, March 25, 2021 /EINPresswire.com/ --

Astrodata, the new dating app of 2021 is revolutionizing the online dating scene. This new dating app is founded on a cutting-edge algorithm that is used in order to predict the compatibility between two people.

Astrodata's unique algorithm reaches up to 92% match accuracy, even before two individuals start chatting!

In late February 2021, the Astrodata app was launched in the United States and the U.K. In both countries, it has received enormous growth and popularity. Users are flocking to Astrodata on a daily basis, finding that Astrodata provides a real alternative to the current and traditional dating avenues. The app is now making headlines around the world.

The CEO of Astrodata says "Since the launch, we have witnessed great growth and thousands of chat conversations every day between users". He continued to say "The plans for Astrodata in April 2021 are significant and they include launching on the Indian market. We have local partners on-board and are opening a new office in India. The Indian version will also be available in the Hindi language."

Astrodata is a safe and secure platform and is only accepting verifiable users. Astrodata also enforces tight screening measures to make sure that all user information is protected and safe. The COO states "We want our app platform to provide a safe and enjoyable space for users, where they find true companionship within a protected arena".
