# LoginRadius Launches Authentication API Analytics for Businesses to Evaluate API Performance

CIAM leader to provide the analytics report for requests made by consumers to various LoginRadius APIs

SAN FRANCISCO , CALIFORNIA , USA, March 25, 2021 /EINPresswire.com/ -- LoginRadius, a leading global provider of consumer identity and access management (CIAM) solutions, today announced the launch of its new feature "Authentication API Analytics".

Authentication API Analytics

Authentication API Analytics is a high productivity tool that businesses and their developers can use to view and measure an application's overall performance when using LoginRadius.

With APIs at the center of digital transformation, the feature provides the analytics report for

requests made to various types of LoginRadius APIs. It offers useful comparative charts to display request count, response code and response time for the utilized LoginRadius APIs.

"We're excited to introduce this feature that provides first-class API analytics to help businesses and their developers meet the ever-evolving consumer demands," says Deepak Gupta, CTO of LoginRadius.

"Besides, they can also analyze if their investments in LoginRadius CIAM and respective APIs are yielding a good

ROI and conduct business as they see fit," he adds.

The Authentication API Analytics feature offers the following benefits for businesses and their

developers:

Request Count: It offers a comparative chart view for the number of requests made to various types of LoginRadius APIs.

Response Code: It tracks all API response codes to see the number of HTTP success(2xx) and error(4xx, 5xx) requests that the LoginRadius server has handled for the selected time interval.

Performance Analysis: It gives information on how the LoginRadius APIs perform for a business, i.e., the response time of the APIs. This information is available for APIs like Profile lookup APIs, Authentication APIs, Profile creation APIs, Profile deletion API, and Profile update APIs.

Businesses can build high-quality and secure authentication for their applications using LoginRadius. They can also understand consumer behavior and transform their business accordingly.
