

# PetDine Opens 2nd State-of-the-Art Manufacturing Facility

*New Fort Collins Facility and Extension to Company's 220,000 sqft Harvard, IL, Facility*

FORT COLLINS, COLORADO, UNITED STATES, March 30, 2021 /EINPresswire.com/ -- Already the largest pet supplement manufacturer in North America, [PetDine](#) is

increasing its private-label, pet-product offering by opening an additional 10,000 square foot, state-of-the-art manufacturing facility near its Fort Collins, CO, headquarters. The new facility will allow PetDine to increase production, increase speed to market for PetDine clients and further heighten PetDine's passion to make the highest quality pet products on the market.

Increasing production capacity and staying on the cutting edge of manufacturing will help us speed up our clients' go-to-market timeline and maintain leadership within the industry."

*Preston Munsch, PetDine CEO*

PetDine produces customized pet products, [soft chews](#) and powder supplements for its private-label clients, and is a leading innovator with liquid food toppers, one of the fastest growing segments in the pet health and wellness market. The new Fort Collins facility will serve as an adjunct space to the company's expansive Harvard, IL, facility and will double production capacity specifically for liquid food toppers. The Fort Collins facility will soon hold the same Safe Quality Food (SQF) code as the Harvard facility, which

is widely considered one of the most rigorous and comprehensive food safety and quality standards in the world.

"The pet products industry is a fast-paced, ever-growing industry," said Preston Munsch, PetDine CEO. "Increasing production capacity and staying on the cutting edge of manufacturing will help us speed up our clients' go-to-market timeline and maintain leadership within the industry."

Under the guidance of Jay Sokolowski, PetDine Senior Production Manager, the Fort Collins facility will utilize the company's access to more than 300 high-quality ingredients to increase output of pet product formulations unique to each client. Unlike most pet product manufactures, PetDine's distinctive production process uses no water, which can produce mold, and no heat, which can change the integrity, viability and structure of the product or chew. Health and safety are top priorities, so products are manufactured without such ingredients as

corn, wheat, sugars, salts, artificial colors and gumming agents.

“Whether it is liquid pet food toppers, natural animal chews or powders, we want to provide the best health benefits to our four-legged friends and outstanding results at a faster pace for our clients,” said Jay Sokolowski, PetDine Senior Product Manager.
