The collaboration software market consists of sales of team collaboration software and its related services. The collaboration software aims to facilitate communication between the team members by providing a convenient and informal space to the user, perform group talks, and share relevant information. Team collaboration software is a platform to facilitate quick communication, address questions and queries, access shared knowledge & files, and check tasks. It offers various features such as task management, file sharing, messaging, document collaboration, VoIP and video conferencing, task management, calendar, integration, and search.

Trends In The Global Collaboration Software Market

Companies in the collaboration software market are increasingly investing in research and development to cater to the needs of the users and enhance coordination amongst the teams. Microsoft, for example, released a free version of the Microsoft Teams software in 2018. This software will allow customers to have joint meetings, calls, and talks, along with company security, enforcement, and extra storage and it can be used for the whole organization, regardless of size. Such developments are likely to strengthen market competition among

players and consequently increase forecast-period growth in the overall team collaboration software market.

Global Collaboration Software Market Segments:

The global collaboration software market is further segmented based on software type, deployment, end user and geography.

By Software Type: Conferencing Software, Communication And Coordination Software.

By Deployment: Cloud, On-Premise.

By End User: IT & Telecom, BFSI, Retail, Healthcare, Government, Others.

By Geography: The global collaboration software market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
