The design services market consists of sales of design services such as interior, industrial, graphic and fashion design services, and related goods by entities (organizations, sole traders and partnerships) that plan, design and administer design projects according to the client's specifications.

[Trends In The Global Design Services Market](#)

General professional service agencies are rapidly shifting towards IT transformation and digitalization services. With the emergence of advanced data analytics, big data is turning out to be a critical tool for market research companies while executing research projects on a large volume of data to offer analytics solutions to give more robust insights to their clients. Advertising and PR firms are offering digital campaigns taking advantage of the increasing digitalization and advances in social media, search engine marketing, content marketing and e-commerce technology. As a result of increasing internet penetration and smartphone users, online content marketing campaigns are expected to be three times more effective and cost 62% lesser than traditional campaigns.
