The medical waste management market consists of the revenue generated from establishments providing services that include collection, transportation, storage, treatment, disposal, and recycling of waste. Biomedical waste is generated during the diagnosis, treatment, and immunization of human beings or other living beings from healthcare facilities.

Trends In The Global Medical Waste Management Market

Recycling is expected to become a key trend in medical waste management. The ongoing medical supplies shortage due to the COVID-19 pandemic has resulted in the need for more sustainable and recycling of medical products. Battelle Critical Care Decontamination System, which was approved in April 2020 by Food and Drugs Administration (FDA), uses hydrogen peroxide for decontamination of N95 respirators and PPE kits.

Global Medical Waste Management Market Segments:

The global medical waste management market is further segmented based on type, treatment, services, waste generator and geography.
