

Pharmaceutical Excipients Industry Trends Include Increased R&D And Acquisitions

*The Business Research Company's
Pharmaceutical Excipients Global Market
Report 2021: COVID-19 Growth And
Change To 2030*

LONDON, GREATER LONDON, UK, April 4, 2021 /EINPresswire.com/ -- Our reports have been revised for market size, forecasts, and strategies to take on 2021 after the COVID-19 impact: <https://www.thebusinessresearchcompany.com/global-market-reports>

The increase in research and development in pharmaceutical formulations to enhance the production process and product quality by using multi-functional excipients is a trend shaping the market. Excipients play a significant role in helping pharmaceutical manufacturers better support patients by increasing compliance and treatment effectiveness. For instance, Evonik's newly launched EUDRAGIT FS 100 is a solid version of the existing EUDRAGIT FS 30 D. This new multi-functional version allows pharmaceutical companies to use the polymer in many new applications, such as hot-melt extrusion, solvent spray-drying, and solvent coating, which was impossible to achieve in past decades where only the aqueous version was available.

Other pharmaceutical excipients market trends include mergers and acquisitions. In December 2018, Roquette, a global manufacturer of plant-based excipients, acquired the majority stake in Crest Cellulose for an undisclosed amount. This acquisition will increase Roquette's footprint in India and expand its portfolio. Crest Cellulose is an India-based excipient manufacturer.

Major players in the pharmaceutical excipients market are, Archer Daniels Midland Co., Associated British Foods, Dow Chemical Company, Evonik, Croda International Plc, Ashland, BASF SE, The Lubrizol Corporation, and Roquette Frères.
