

Mighty Paw Naturals Launches 100% Natural Yak Cheese Dog Chews for Teething Puppies and Bored Power Chewers

The family orientated dog gear company released long lasting yak cheese dog chews made with 3 ingredients only: yak & cow milk, salt and lime juice.

ROCHESTER, NY, USA, April 2, 2021

/EINPresswire.com/ -- [Mighty Paw](#), creators of the Smart Bell, Sport Dog Harness 2.0 and other innovative dog gear, announced the launch of a new edible dog line today. The [Mighty Paw Naturals Yak Cheese Dog Chews](#) are hard yet fully edible chews that soften with exposure to a dog's saliva. They encourage chewing which reduces tartar and plaque buildup, and are specifically geared towards teething puppies and bored or anxious power chewers up to 75 lbs.

Each package consists of 4 cheese sticks that don't contain any added flavors and are grain-free, gluten-free, chemical-free, preservative-free, mess-free, smell-free, and - most importantly - guilt-free! They're even lactose-free because the curing process removes the lactose from the milk.

"It is with great happiness and excitement that we announce the launch of our new edible line of dog chews" said Corey Smith, CEO and founder of Mighty Paw. "Our new Yak Cheese Dog Chews are sourced in Nepal and hand-inspected by us here in the US. They're rich in protein and calcium, and a healthy, longer lasting alternative to bleached rawhide chews and similar treats with long lists of artificial ingredients. They're also a wonderful option for dogs with sensitive stomachs and chicken, beef, pork & grain allergies."

Mighty Paw Naturals now offers long-lasting, limited-ingredient Yak Cheese Dog Chews
