

# Jordan Jacobs Offers Non-Surgical Nose Reshaping Procedure at Her NYC Medical Spa

*One of the nation's leading experts at providing natural-looking solutions to enhance individuals' beauty has expanded her company's services.*

MOUNT KISCO, NEW YORK, UNITED STATES, April 6, 2021

/EINPresswire.com/ -- Representatives for [Jordan Jacobs](#) announced today that she is now offering non-surgical nose reshaping procedure at her NYC Medical Spa.

"The [non-surgical nose job](#) is a safe, non-invasive alternative to traditional rhinoplasty using precisely placed dermal filler injections to instantly and affordably sculpt and reshape the nose," said Jordan Jacobs, a world-class expert in advanced facial anatomy, non-surgical rejuvenation, and management.

Jacobs explained that the non-surgical nose job is for people who want to change the shape of their nose without the excessive downtime, general anesthesia, and prolonged healing associated with rhinoplasty surgery. Non-surgical rhinoplasty, Jacobs revealed, begins with the application of a numbing cream followed by fine needle filler injections which are massaged to sculpt the desired look- all while you are fully awake. Results typically last 6 to 12 months depending on the individual and product used, and regularly scheduled treatments help to maintain the desired look.

In addition, Jacobs is also now offering [lip enhancement](#) solutions at her medspa in NYC. Lip fillers immediately plump, volumize, and define the shape of your lips through the injection of hyaluronic acid, a substance that is naturally produced in the body.

Jacobs explained that lip enhancement is achieved by injecting the filler, hyaluronic acid, into the lips after the application of a numbing solution. It is slowly broken down over a period of months with results typically lasting three to 12 months, depending on the individual and product selected. It is highly recommended that treatments are performed on a regular basis to maintain

full, natural lips. Discontinuation of treatment may result in the lips returning to pre-treatment appearance.

In addition, Jacobs' medspa in NYC is also offering Fat Removal ( [https://jordanjacobsnyc.com/portfolio\\_page/fat-removal/](https://jordanjacobsnyc.com/portfolio_page/fat-removal/) ). Fat removal, according to Jacobs, targets small, stubborn areas of fat that can be permanently eliminated with injections of Kybella, which destroys fat cells and causes them to be expelled from the body.

Jacobs, a registered nurse, who offers clients simple, natural-looking solutions to enhance peoples beauty through a combination of compassion, knowledge, and personal attention, went on to explain that fat removal is deoxycholic acid - a naturally occurring molecule in the body that helps break down and remove fat from stubborn areas such as a double chin, abdomen, arms, and thighs.

Jacobs began her non-surgical aesthetic practice, formerly known as Genuine Aesthetics, in the New York Metropolitan area of Long Island, New York, under the direction of Dr. David Funt.

Now operating the business under her own brand, Jordan Jacobs, she treats clients in offices in New York, New Jersey, Texas, California, and Canada, while training medical practitioners all over the world.
