

# CareServ Partners with Hucu.ai for Superior Communication with Skilled Nursing Covid Heros

*Skilled Nursing Facilities require the best support. Hucu.ai and CareServ are partnering to revolutionize communication and care coordination in senior care.*

CHICAGO, IL, USA, April 6, 2021 /EINPresswire.com/ -- One year into the global pandemic, Skilled Nursing Facilities are still on the front lines and require the best support possible to keep their residents safe and healthy. Toward that goal, Hucu.ai and CareServ are partnering to revolutionize

communication and care coordination in senior care. CareServ aims to bridge the gap between the senior care industry and efficient technology. Technology within this segment is often out of date or low quality which results in expensive maintenance or gaps in service which in turn

jeopardizes an organization's financial strength, the residents' health, and PHI (Protected Health Information). CareServ is committed to improve the senior care industry challenges by revolutionizing how technology serves them with round the clock support.

“

Hucu.ai helps facilities to make timely care decisions. Care teams spend more time providing care instead of chasing contacts & communicating 1 on 1 with each care member for each specific patient. ”

*CareServ CEO Jeremy Spradlin*

By being the experts in senior living technology solutions, CareServ helps healthcare organizations by providing best practices and custom technology solutions that let staff focus time and energy on providing better quality care to residents. CaseServ and Hucu.ai together deliver improved, SECURE, and easy patient-centered messaging technology, training, and consulting services to ease the burden of

compliance and internal operations for senior living owners and operators.
