Dony Garment Company, a subsidiary of Dony International Corporation, has been one of the largest manufacturers of workwear, uniforms, and casual clothing in Vietnam since 2009. Last year, it responded to the Covid-19 pandemic with Dony Masks that have become synonymous with impeccable quality.

These masks are created to meet global standards for exports and use. Moreover, its design

keeps users' convenience in mind. As the strap of the Dony Mask extends to 270% of the original length, they reduce any discomfort caused to users. These masks also retain their 99% antibacterial properties even after 60 washes.

Dony Mask is three-layered and extremely skin-friendly. Some of its user smart features include nose clips and adjustable earloops. They purify the air from dust, pollen and also offer 99.95% UV protection. But at the same time, they are sleek and stylish available in many cool colors for users.

The fact that these masks are reusable has added to their popularity as there is a growing emphasis on eco-friendly products. People can save the hassle of disposable masks and good amounts too while doing the right thing for the planet. It's not surprising then that Dony Masks are being sold widely all over the world.

Spotting the huge potential of these masks many sellers have come forward to distribute them. POD Retail Inc. is one such name, which will take Dony Masks to the Canadian market.

Finished units are shipped in medical packaging. They can be sterilized with EO gas technology that is commonly used for medical supplies. An indicator strip shows the wearer if the mask has been sterilized. This commitment to quality enables DONY to export the masks to demanding countries like the USA and destinations in Europe.
