The DTP vaccines market consists of sales of vaccines used for the treatment of diphtheria, tetanus, and pertussis (whooping cough) and related services by entities (organizations, sole traders and partnerships) that produce vaccines for diphtheria, tetanus, and pertussis. The different types of vaccines available for these diseases include DTaP (diphtheria, tetanus, and acellular pertussis) vaccine, DT (diphtheria and tetanus) vaccine, Tdap (combined tetanus, diphtheria and acellular pertussis) vaccine and Td (tetanus and diphtheria) vaccine. The market consists of revenue generated by the company's manufacturing DTP vaccines by the sales of these products.

Trends In The Global DTP Vaccines Market

Companies in the DTP vaccines market are increasingly investing in manufacturing DTP combination vaccines, which reduces multiple vaccination shots for immunization against infectious disease. DTP combination vaccines such as tetravalent (DTP-HepB), pentavalent (DTP-HepB-Hib) and hexavalent vaccine (DTP-Hib-HepB-IPV) are available to provide the same protection as individual vaccine shots given separately.
