

Immunity Boosting Food Products Such As Yogurt Are In Increased Demand For Health During The Pandemic

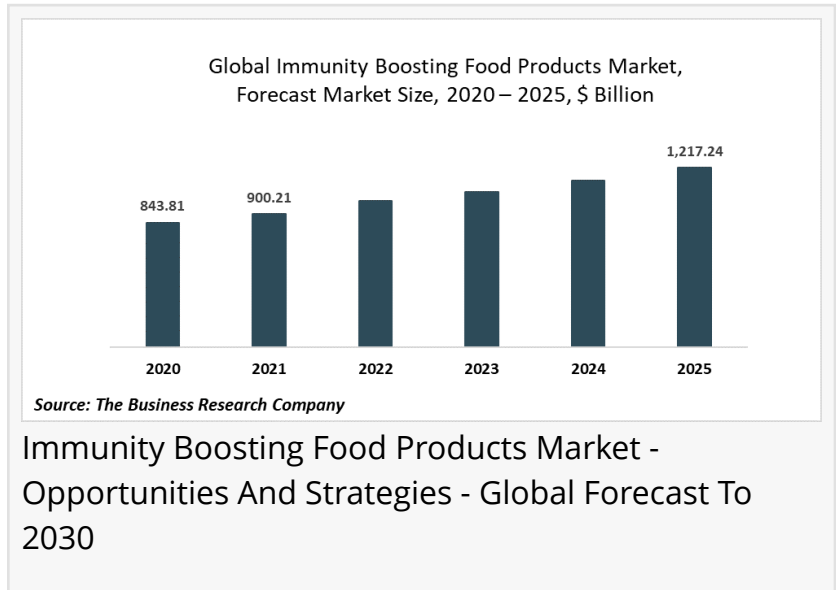

The Business Research Company's Immunity Boosting Food Products Market Report - Opportunities And Strategies - Global Forecast To 2030

LONDON, GREATER LONDON, UK, April 12, 2021 /EINPresswire.com/ -- Our reports have been revised for market size, forecasts, and strategies to take on 2021 after the COVID-19 impact: <https://www.thebusinessresearchcompany.com/global-market-reports>

Yogurt is the best-known dietary source of probiotics that can give the immune system a boost. It is also high in protein, vitamin A, and zinc. Recently, probiotic-containing yogurt has gained market prominence as it contains biologically active ingredients that have more metabolic and physiological health benefits than nutritional benefits. In addition, probiotics are related to a variety of health advantages, which help in stimulate the immune system to fight off disease. Moreover, as a food commodity that is abundant in probiotics, yogurt is the first food consumers consider. Protein-rich Greek probiotics-boosted yogurt also adds to the market being examined. For instance, manufacturers, such as Fage, produce high-quality products to give customers extra benefits.

The immunity boosting foods market covered in this report is segmented by product type into herbs & spices, nuts & seeds, fruits & vegetables, dairy-based products, probiotics and prebiotics, others. The immunity boosting food products market is also segmented by form into tablets, capsules, powder, liquid, others and by distribution channel into store-based, non-store-based.
