

Flower Turbines Reg A+ Crowdfunding Reaches \$2 million

Flower Turbines Using Its Increased Funding for Manufacturing and Expansion of Small Wind Turbines and E-Bike Chargers

LAWRENCE, NEW YORK, USA, April 12, 2021 /EINPresswire.com/ -- [Flower Turbines](https://www.einpresswire.com/Flower-Turbines), maker of innovative wind turbines and e-bike charging product, raised \$2 million since January 2021. This allows immediate steps to grow the company faster. One current goal is North American manufacturing.

Flower Turbines is an innovative small wind energy company making turbines that are the first to be simultaneously quiet, beautiful, efficient, and which make their neighbors perform better. The company has a complementary product line of on and off grid e-bike charging stations. The Flower Turbines technology is based on multiple granted and pending patents. Flower Turbines has growing sales of its products in Europe and is planning its first US installation in May 2021. "We have the ambition to become a major global force in distributed energy," said CEO Dr. Daniel Farb. "We believe we have the technology and enthusiasm to accomplish it." Flower Turbines previously finished two oversubscribed Reg-CF crowdfunding rounds.

Flower Turbines is one of the first equity crowdfunded companies to be a winner of Pepperdine Graziado Business Schools annual [Most Fundable Companies](#) in America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined. The Most Fundable Companies initiative involved a multi-phase assessment that evaluated multiple company variables including financial projections, market opportunity, intellectual property, and the strength of the management team. Usually, the other winners have been traditionally funded by Angels and Venture Capital. Here is a link to a recent video of its wind/solar charging poles: <https://vimeo.com/516976674>
