

# New Program Offers Parents the Secrets of Raising a Happy, “Superstar” Baby and Igniting Their Hidden Potential

---

*Prodigy Framework requires five minutes per day and no screen time*

NEW YORK, USA, April 12, 2021 /EINPresswire.com/ -- Raising Superstars Enterprises, whose [Prodigy Framework](#) has helped more than 35,000+ families ignite the hidden potential of their babies, is now accepting applications for its Thursday through Sunday weekend sessions.

The program teaches parents how to master the three secrets of raising a happy, superstar baby up to 2 years of age and awaken his or her unconscious genius.

The Prodigy Framework is a multi-disciplinary program that develops incredible, almost miraculous, abilities in babies. It covers topics like Athleticism, Reading, Math, Music, Creativity, Knowledge, etc. With the Prodigy Framework program, babies have achieved such feats like: crawling at 3 months instead of 8 months; walking at 8 months instead of 12 months; reading at 24 months instead of 6 years; singing in perfect harmony at 24 months; and developing a vocabulary of more than 200-plus-words at 18 months of age instead of an average of 20 words. Babies also develop extraordinary memory, athleticism, intelligence, creativity, independence and more.

Other benefits that babies gain from the program include photographic memory, sports prowess, math skills, encyclopedic knowledge, and speed reading, oratory and music abilities.

The Prodigy Framework requires just five minutes per day to develop a baby’s hidden potential. Parents simply have to watch video instructions, and then do the suggested activity with their baby for that day.

The five-minute time frame is perfect for working moms with time constraints. With its fun-filled activities, the program is also ideal for first-time and stay-at-home moms. The Prodigy Framework is convenient for dads, as well, who can do the program during their free time.

Using the Prodigy Framework program, parents can:

- Access the hidden potential of their babies before the age of 2.
- Awaken a baby’s unconscious genius so that they can lead a life full of health, wealth and

happiness.

- Learn how to keep their babies away from the pressures and stress of schoolwork.
- Know the rules that allow them to understand exactly what is going on in a baby's mind.

After completing the program, parents also join a community of other like-minded, highly engaged parents.

The Prodigy Framework program was developed by Raghav Himatsingka, a Stanford University graduate who devoted more than 2,000 hours of study to discover the secrets of accelerated learning after his son, Prabal, was born. "I found there's a lack of an easy-to-use parenting system to raise a well-rounded, happy baby who would never have to face the struggles of learning in life like I did," he said.

Himatsingka and his wife, Shraddha, "are on a mission to help more than one million parents make the life of their children a lot more happy and meaningful. If your baby is less than 2 years old, and you wish to give them the best gift of their life, this program is for you."

The Prodigy Framework carries a money-back guarantee for 30 days.
