The utilities market consists of sales of electric power, natural gas, steam supply, water supply, and sewage removal services by entities (organizations, sole traders and partnerships) that provide electric power, natural gas, steam supply, water supply, and sewage removal services. The market excludes waste management and remediation services which collect, treat, and dispose of waste materials, but do not use sewer systems or sewage treatment facilities. The utilities market is segmented into water and sewage, natural gas distribution and electric power generation, transmission, and distribution.

Trends In The Global Utilities Market

Digital technologies are increasingly making their way into power generation, transmission and distribution industry to enhance productivity, efficiency and safety associated with power plants. Digital technologies such as smart grids, sensors and smart meters provide the company and the customer, with more accurate and real-time account of power usage. These technologies help to improve productivity, efficiency, safety, compliance and reliability in power generation and distribution. This results in better asset management, planning, execution, and faster level of service with higher customer satisfaction.
