

ESG Stock News: Defense Metals (TSX: \$DEFN.V; OTC: \$DFMTF) Prepares More High-Grade REE Concentrate Samples For Eval

Defense Metals (TSXV:DEFN / OTC:DFMTF) has requests from two leading global REE enterprises to provide samples of Wicheeda mineral concentrate for evaluation

VANCOUVER, BRITISH COLUMBIA, CANADA, April 12, 2021

/EINPresswire.com/ -- Mining/Metals/ Green Energy Stock News from Investorideas.com Newswire, MiningSectorStocks.com and RenewableEnergyStocks.com - Defense Metals Corp. ("Defense Metals") (TSX-V:DEFN /

OTCQB:DFMTF/ 35D: FSE) is pleased to announce that it has recently been notified by its Asian based advisor Golden Dragon Capital Limited ("GDC") that it has received requests from two leading global Rare Earth Element (REE) smelting and separator enterprises to provide samples of Wicheeda REE mineral concentrate for the purposes of evaluation prior to entering discussions with respect to the negotiation of an initial memorandum of understanding (MOU) and subsequent potential mineral concentrate offtake agreements.

These requests represent the third and fourth REE concentrate evaluation requests received by the Company to date, and discussions are currently ongoing with several other parties. Defense Metals is currently advancing the road accessible Wicheeda Critical Rare Earth Element (REE) Property, which is located close to infrastructure approximately 80 kilometres northeast of Prince George, British Columbia (BC). The Wicheeda project has indicated mineral resources of 4,890,000 tonnes averaging 3.02% LREO (Light Rare Earth Elements) and inferred mineral resources of 12,100,000 tonnes averaging 2.90% LREO 1).

Concentrate sample requests are significant given that these rare earth smelting and separator enterprises have previously executed capital investment, in addition to REE mineral concentrate

product offtake MOU agreements, with multiple international third party REE miners and explorers.

Craig Taylor, CEO of Defense Metals, stated: "We have now received four requests for evaluation samples of our high-grade Wicheeda REE mineral concentrate from Asian-based REE refiners. Defense Metals believes this underscores growing international market demand for readily accessible, high-quality, North American REE products. Discussions with potential offtake partners have the potential to yield benefits through opportunities for direct project funding, technical services agreements, and access to the full downstream rare earths value chain."

About the Wicheeda REE Property

The 1,708 hectare Wicheeda REE Property, located approximately 80 km northeast of the city of Prince George, British Columbia, is readily accessible by all-weather gravel roads and is nearby to infrastructure, including power transmission lines, the CN railway and major highways.

Geologically, the property is situated in the Foreland Belt and within the Rocky Mountain Trench, a major continental geologic feature. The Foreland Belt contains part of a large alkaline igneous province, stretching from the Canadian Cordillera to the southwestern United States, which includes several carbonatite and alkaline intrusive complexes hosting the Aley (niobium), Rock Canyon (REE), and Wicheeda (REE) deposits.

Qualified Person

The scientific and technical information contained in this news release as it relates to the Wicheeda REE Property has been reviewed and approved by Kristopher J. Raffle, P.Geo. (BC) Principal and Consultant of APEX Geoscience Ltd. of Edmonton, AB, a director of Defense Metals and a "Qualified Person" as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects. Mr. Raffle verified the data disclosed which includes a review of the analytical and test data underlying the information and opinions contained therein.

About Defense Metals Corp.

Defense Metals Corp. is a mineral exploration company focused on the acquisition of mineral deposits containing metals and elements commonly used in the electric power market, military, national security and the production of "GREEN" energy technologies, such as, high strength alloys and rare earth magnets. Defense Metals has an option to acquire 100% of the 1,708 hectare Wicheeda Rare Earth Element Property located near Prince George, British Columbia, Canada. Defense Metals Corp. trades in Canada under the symbol "DEFN" on the TSX Venture Exchange, in the United States, under "DFMTF" on the OTCQB and in Germany on the Frankfurt Exchange under "35D".
