

Emagined Security achieves CREST accreditation in Penetration Testing

With its accreditation, the company is setting the highest standards for Penetration Testing in the world.

SAN CARLOS, CALIFORNIA, UNITED STATES, April 13, 2021 /EINPresswire.com/ -- [Emagined Security](#), an influential cybersecurity service provider, is proud to be recognized as a CREST accredited organization in the Penetration Testing space. As a not-for-profit accreditation body, CREST provides a world-renowned standard for penetration testing, vulnerability assessments, cyber incident response, and more.

Emagined Security is a leading provider of professional services for information security and compliance solutions. The company empowers its clients by helping them effectively manage IT Risk in today's ever-changing business environment. With deep industry expertise and a proven track record, Emagined Security can scale quickly and efficiently to provide best-in-class organizations with the rapid response required. Its clients cover a wide range of U.S. and Global Fortune 500 organizations, including financial services, healthcare, pharmaceutical, high tech, manufacturing, energy, and insurance industries.

In the company's most recent news, Emagined Security has received a coveted CREST accreditation in Penetration Testing. The company's Penetration Testing practice was examined by thorough and meticulous assessments to ensure its methodologies and the team's knowledge, experience, and skills met CREST's demanding criteria. In parallel, CREST also assessed aspects of Emagined Security's cybersecurity processes and general governance, focused on the company's capacity to achieve continuous improvement in education and general employee development.

"CREST is pleased to welcome Emagined Security as an accredited member company," said Ian Glover, President of CREST. "By achieving the globally recognized CREST accreditation, which requires rigorous assessment of business processes, data security, and testing methodologies, Emagined Security is able to demonstrate the highest standards in Penetration Testing and take advantage of the growing demand for these services across public and private sectors."

"The CREST accreditation simplifies and accelerates our customers' business decision making process and it validates our experience and strong methodology in an extremely competitive industry," states Paul Underwood, COO of the company.

“In a market without barriers to entry, we see new players arrive every day that believe running a bunch of tools against a target can be called a Penetration Test, which is seriously decreasing the security posture of the cyberspace,” concluded David Sockol, CEO. “We are very proud of our Penetration Testing Frameworks and are happy that our CREST accreditation supports our best practices approach.”

As a member of CREST, Emagined Security is substantiated as a trustworthy provider of penetration testing services. To obtain more information regarding the company's [Penetration Testing Services click here](#).
