content creators with suppliers providing cutting edge technologies for the media and broadcast industries. Over the course of five days, the event will feature over 100 companies presenting both their newest developments and discussing the current marketplace through a series of three-minute presentations.

"

DPP Innovation Week brings together the leading broadcasters and cutting edge technology creators, helping to advance the entire industry. We're thrilled to showcase our newest developments there."

Neil Blake, axle ai

Neil Blake, axle ai's EMEA Business Development Manager, will be presenting on the company's latest innovations in video search through the use of AI and machine learning. Axle ai's flagship software, axle ai 2021, combines remote, proxy based access with face and object recognition capabilities as well as transcription, helping media teams who would have previously used basic manual tagging processes for their media libraries. Axle ai's companion connectr workflow application is a no-code automation tool for media workflows, with an easy to use graphical front end.

"This Spring's Innovation Week brings together the leading broadcasters and cutting edge technology creators, helping to advance the entire industry." says Neil Blake, "We're thrilled to showcase our newest developments at the event."

Axle ai's talk will take place on Thursday, April 15th at 5:30PM BST/12:30PM ET and 9:30AM PT as part of a series of Media Processing and Content Enrichment presentations. The event starts daily at 4PM BST; you can register for free and replay past events at www.thedpp.com/dpp-innovation-week.
