

AltumView Sentinare 2 Smart Activity Sensor is Available for Pre-order

VANCOUVER, BC, CANADA, April 20, 2021 /EINPresswire.com/ -- AltumView is pleased to announce that its award-winning Sentinare 2 smart activity sensor is available for pre-order now at its website www.altumview.com.

Sentinare 2 is a revolutionary smart activity sensor for senior care, home health monitoring, and telehealth. It was recently selected as a [CES 2021 Innovation Awards Honoree](#).

Build on the success of AltumView's previous Cypress sensor, Sentinare 2 is much smaller, has lower cost, and enjoys the same powerful features. It converts people's activities into stick figure animations, and records the stick figures in the cloud for search, statistics, and analytics, while protecting people's privacy. It can also detect emergencies such as falls and wandering of dementia patients.

In addition to privacy protection, the stick figure has much lower cost in transmission and storage than video, and provides valuable information about people's behaviors. For example, it can help physicians to design and adjust treatment plans for patients, and identify certain diseases earlier, such as Parkinson's disease, dementia, and depression.

Sentinare 2 is a game-changer for senior care and telecare

PRE-ORDER

Sentinare 2 Smart Activity Sensor

169.99 USD/219.99 CAD

One Sentinare 2 smart activity sensor, with six months of free subscription plan, and free shipping.
