The intravenous infusion pumps market consists of sales of intravenous infusion pumps and related services by entities (organizations, sole traders and partnerships) that manufacture intravenous infusion pumps. An intravenous infusion pump is a medical device that provides regulated quantities of fluids, such as nutrients and medicines, into the body of the patient.

The growing technological improvement is a major trend gaining popularity in the intravenous infusion pumps market. Technological advances in infusion pumps have changed medical care in hospitals and allowed patients to inject fluids on an outpatient basis or in a home setting, allowing them to seek treatment while living their daily lives, through the use of smart intravenous infusion pumps. These smart intravenous infusion pumps help prevent medication errors and reduce patient harm.

Global Intravenous Infusion Pumps Market Segments:

The global intravenous infusion pumps market is further segmented based on product, end

user, application and geography.

By Product: Volumetric, Syringe, Enteral, Ambulatory, IV Disposables, Others

By End-User: Hospitals, Ambulatory Surgical Centers, Cancer Treatment Centers, Specialty Clinics, Others.
