The smart home security systems market consists of sales of smart home security devices and related services. Smart home security devices can be connected to Wi-Fi and accessed from anywhere using smartphones, smartwatch or voice. The security devices produced includes devices such as smart alarms, smart cameras, smart locks, smart detectors, and others. This market does not include the installation of these devices and/or integration with the home set-up.

Trends In The Global Smart Home Security Market

Smart home security systems manufacturers are increasingly integrating technologies with visual recognition based on AI (Artificial Intelligence) in security devices. AI is developing to a new stage where the security confirmation and authentication will be processed from face and visual recognition. Home security systems such as consumer video cameras are integrated with AI technology with a new security validation framework to enhance safety and security through facial recognition, fingerprints, and voice recognition. AI is proposed to be applied in smart alarms to create databases of all incoming alerts, which then could be analyzed to predict false alarms.
