Lee Cummings has been doing research on multiple strains of Paleo Hebrew: Aramaic, Phoenician, Moabite, Ammonite, as well as those artifacts that have been unearthed in ancient Turkey (which was called Anatolia). Technically, all of these strains of Hebrew have one thing in common...the alphabet is the same! I have researched the Kilamuwa Stele, Baruch Stele, Karatepe Stele, Moabite Stele, Tel-Dan Stele, Siloam Inscription, and the Bukan Stele within these past 11 years. My research has led me to an indisputable conclusion, which I will share within this article, and that is...these stone steles have been mistranslated!

Today we will examine a few lines from the Kilamuwa Stele to illustrate to you how the scholars missed relevant information on the stones that verify the Biblical record of Israel and Judah. The Kilamuwa Stele was discovered by the German Oriental Society. The expedition was led by Felix Von Luschan and Robert Kolday between 1888 and 1902. The Kilamuwa Stele is comprised of two registers that are a total of eight lines apiece. The Egyptologist and others have said that there isn't any proof of Israel outside of the Bible and this stone stele proves them wrong. The Kilamuwa stele has the names of Pharez Judah, Israel, Anaka Hebron, and Adar Syria on it. The Kilamuwa Stele mentions Ashur the Assyrian taking the ten tribes of Israel into captivity, it actually calls them the ten...all of this was missed by Academia!
