

GreenHaus BlockChain executes an order for 3,600 S19j Pro Antminers from Bitmain for \$25 million

This represents a significant entrance for GreenHaus into the Bitcoin Mining Space.

BUFORD, GA, USA, April 26, 2021 /EINPresswire.com/ -- <u>GreenHaus</u> Blockchain ("GreenHaus", "GreenHaus Blockchain" or the "Company"), one of the leading startups in the <u>Bitcoin</u> mining industry in the United States and the South Eastern United States, today announced a large-scale contract for the purchase of 3,600 S19j Pro

GreenHaus Blockchain Logo

Antminers for USD \$25 million from <u>Bitmain</u> Technologies Limited ("Bitmain"). This purchase agreement represents a significant step forward in GreenHaus's strategic goal of entering the Bitcoin mining space both as a mining operation and as a hardware supplier.

This purchase agreement secures GreenHaus's projected development and growth plans for 2021 and into 2022. Greenhaus is scheduled to receive a minimum of 300 S19j Pro Antminers monthly starting in August of 2021 and will continue through July 2022.

GreenHaus will have a pool of approximately 3,600 Antminers, 100% of which will be the latest generation S19j Pro series model. The S19j Pro operates at 100 TH/s and consumes 2,950 watts of energy. For this purchase agreement, GreenHaus is reserving 50% of the S19's for machine resale, and the remaining 50% earmarked for bolstering mining operations.

The significance of securing a large-scale purchase contract comprised of the latest-generation miners of this magnitude, especially during a period of short supply of Bitcoin mining hardware, will help bring the Company into the larger mining operation space. GreenHaus is looking forward to a long-term relationship with market-leading mining hardware supplier Bitmain.

About Bitmain

Founded in 2013, Bitmain transforms computing by building industry-defining technology in cryptocurrency, blockchain, and artificial intelligence (AI). Bitmain leads the industry in the

production of integrated circuits for cryptocurrency mining, as well as mining hardware under the Antminer brand. The company also operates the largest cryptocurrency mining pools worldwide- Antpool.com and BTC.com. Bitmain technology supports a wide range of blockchain platforms and startups.

About GreenHaus Blockchain

GreenHaus Blockchain focuses on investor returns through the mining of Bitcoin to develop assets in the form of cryptocurrency. The Company is expanding its mining operations by securing the most energy-efficient equipment currently available. GreenHaus is headquartered in Buford, Georgia, a suburb of Atlanta, Georgia, and the Company's mining operations are located in several hosting data centers across the United States.

GreenHaus specializes in mining operations, cloud mining, equipment procurement, and resale.

GreenHaus has set up a limited partnership company that assists its investor's expansion into the cryptocurrency mining or blockchain technology space.
