

Isograd Digital Skills Assessment Now Offered through PSI True Talent

VANCOUVER, WA, UNITED STATES, April 28, 2021 /EINPresswire.com/ -- Isograd, a worldwide provider of TOSA® digital skills assessments and certifications, has increased availability of its tests with a new partnership with PSI Services. Isograd's digital skills assessments are now available on the PSI True Talent™ platform.

This will allow talent management professionals worldwide to utilize Isograd's Adobe Creative Suite and DigComp (digital literacy) assessments to identify candidates' strengths and weaknesses and easily transition new employees into career development paths.

Isograd provides the only standard to assess and certify digital skills with a score that measures proficiency levels from beginner to expert. Their assessments utilize interactive questions,

We are thrilled to complement the PSI True Talent platform's world-class screening and development tools with DigComp and Adobe assessments"

Mathieu Lillo, CEO at Isograd, Inc.

including live-in-application, and adaptive testing technology to precisely identify candidates' proficiency level. Question difficulty changes dependent upon the candidate's previous answers to test the limits of their knowledge and skill. In contrast to static tests with a result based on the number of correct answers, Isograd provides a skill level ranking and a detailed result report that clearly identifies the candidate's true level of proficiency.

Organizations adopting Isograd's assessments through the flexible PSI True Talent platform will now be able to:

- Identify candidate skill levels in Adobe Creative Suite applications (Photoshop, Illustrator, InDesign) and digital literacy (DigComp)
- Make educated hiring and training decisions
- Easily transition new hires into appropriate training courses based on skill level

Isograd's digital skills assessments for Adobe Creative Suite applications and digital literacy are now also available through the PSI True Talent platform.

- Maximize training ROI by training only those who need it, on the subjects they need training on

Available on PSI True Talent starting in April 2021, these assessments will provide clients more opportunities to make data driven people decisions from recruitment through career development.

“Assessments for digital literacy and graphics applications are limited. We are thrilled to complement the PSI True Talent platform’s world-class screening and development tools with DigComp and Adobe assessments,” said Mathieu Lillo, chief executive officer at Isograd North America. “Isograd is setting the standard in proficiency-based assessments, providing detailed skills reports to enable better people decisions, which is very much in alignment with PSI’s mission of helping people meet their potential.”
